

Lingnan Research

Project Highlights

As a global leader in Quality Education and High Impact Research, we continue to scale new heights in research and innovation, knowledge creation and impact, to contribute to the United Nations' **Sustainable Development Goals (SDGs)**.

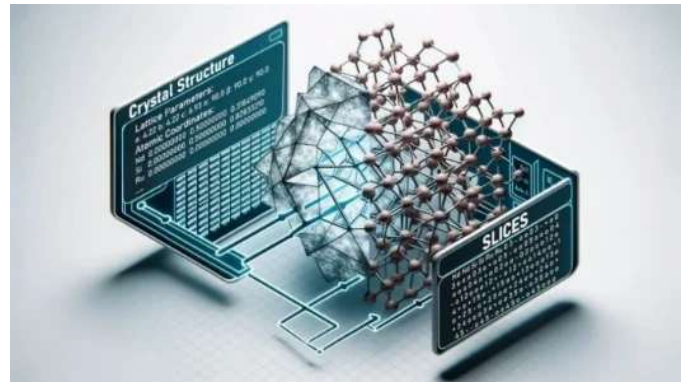

Dimension reduction modeling methods for high dimensional dynamic data in smart manufacturing and operations

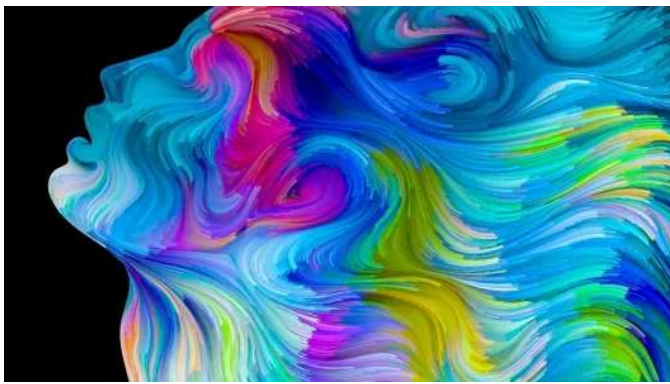

Intelligent Ultra High Definition Video Encoder Optimization for Future Versatile Video Coding

**Adaptive Dynamic Range
Enhancement Oriented to High
Dynamic Display**

**Groundbreaking discovery in
crystal language**

**Manipulating familiarity in human
face recognition**

**Incorporating Visual-Linguistic
Features into Scientific Document
Summarization**

**Conservation of Romer's tree
frogs: Assessment of population
status across Lantau and impacts
of emerging threats**

**Revitalising farmland ecology to
conserve insect pollinators and
ecosystem services in Mui Wo**

Exploring the hidden fish community and fishery value of estuarine mangroves in western Hong Kong waters through environmental DNA metabarcoding

Temporality, Embodiment, and Creativity: A Critical Multimodal Study of New Practices on Chinese Social Media

When customer gratitude makes surface acting more worthwhile: The role of self-enhancement

A comprehensive survey of the diadromous animals of Lantau: assessment of distribution, population status, and conservation strategies

Quantitative History of China

Improving pandemic preparedness

**Financial Technology, Stability,
and Inclusion**

**Young people consider themselves
poor**

Fighting COVID-19 @ Lingnan

Unfair to MDW
